Figure (a) shows the time series of HCHO concentration (ppbv) over altitude (km) at UTC (h) from 21:00 to 23:00. The red line represents CAFE, the black line represents ISAF, and the grey line represents the altitude.

Figure (b) is a scatter plot correlating CAFE HCHO (ppbv) with ISAF HCHO (ppbv) data. The red line is the fit line with the equation $y = 1.04x + 0.024$, and the red dashed line is the one-to-one line. The data points are represented by black dots.
